REMOTE LEARN FUNCTION

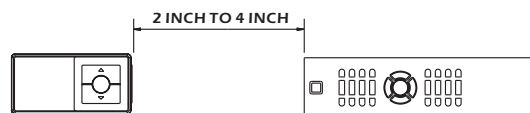

The Harmony 1601 is together with Learn Function Remote control you can control the Harmony 1601 by the supplied remote control Or you can use your Universal Remote Control with Learning Function. With this option makes the Harmony 16M user friendly TV Stand with Swivel Function

Learning method place the Harmony 1601 learn remote control and your Universal learning remote control 2 inch to 4 inch facing each other. Press the Left button key of the Harmony 1601 remote Control and then Press also the button key you want to use and control in your Universal remote control.

Press the both key for 10 to 15 seconds until the light of your Universal remote control blink means the signal learn code already captured to your Universal remote control. Repeat this method for the right and stop button key.

Harmony 1601 is both have internal and external IR sensor the Internal sensor is good for up to 37 inch TV for 42 inch it is depends on the mounting at the back of your TV some the Internal sensor is okay some not. Just in case your TV block the Sensor Lens in front of Harmony 1601 now this time you will use the External Sensor supplied which you can plug to 3.5 mm jack located at the back side of Harmony 1601.
